

“Click + drag” =
select part of the
waveform in
individual
seismogram

“Doble click” =
Pick selected
phase in **individual**
seismogram

“one click over marked
phase” = Remove the
pick in **individual**
seismogram

“Click + drag”
select part of the
waveform, for all
seismograms

Hold “+” while Double click
left to attach ↑ polarity

Hold “-” while Double click
left to attach ↓ polarity

Press “i” to activate the
drawing refrence “|” and
press “o” to deactivate

Shortcut	Action
'a'	Compute trace spectrum
'f'	Compute all spectrums
'z'	Compute Scalogram
'q'	Set Start Time
'w'	Process and Plot
'e'	Set End Time
'i'	Activate Multicursor
'o'	Deactivate Multicursor
'r'	Load last Project and apply filters
'u'	Open Uncertainty picking box
'm'	Select to export waveform to TF
'h'	Select specific trace to Process
'j'	Deselect specific trace to Process
'p'	Plot Record Section
'd'	Deselect trace chop

Shortcut	Action
'Ctrl+D'	Run Script
'Ctrl+L'	Open Macro
'Ctrl+U'	View Picks
'Ctrl+C'	Clean events detected
'Ctrl+M'	Concatenate Seismograms
'Ctrl+P'	Open phases comboBox
'Ctrl+K'	Save CFs (STA/LTA, Wavelet CF, Envelope, Entropy...)
'Ctrl+N'	Plot_all_seismograms
'Ctrl+B'	Stack_all_seismograms
'Ctrl+I'	Deselect all
'Ctrl+J'	Deselect chop from page
